$12 - (9-1) = 12 - 8 = 4$. $4 + 2(9-1) = 4 + 2(8) = 4 + 16 = 20$. If we put those answers in order, we have 3, -6, 12, 4, 20: the original sequence! Using the pattern we found in that equation, we can predict that the next number in the sequence would be related to 20 by subtracting $(x-2)$, where x still equals 9, since in order to get 4 after 12 we had to subtract $(x-1)$ from 12.

What is the next number in this sequence 3 -6 12 4 20 ...

2b. The two alleles of the P generation separate during gamete formation. Each gamete carries only a single allele from each parent, which pairs at random in the F₁ generation.. The process repeats when F₁ plants cross and produce F₂ plants. As a result, the F₂ generation has new combinations of alleles that may be different from those of preceding generations.
