The major difference between the 250 cc D57 and 350 cc R5 of 1972 and the 1973 RD250 and RD350 was that the D57 and R5 utilized piston-port induction, whereas the RDs were introduced with reed valve induction. The 250 was "oil injected" meaning that although the 250 was a 2 stroke or (2 cycle engine) there was no need to premix the gas and oil.
