Most modules exist in two versions: exercises and solutions. However, chapters 1 (fpinjava-introduction), 14 (fpinjava-actors) and 15 (fpinjava-applications) have no exercises. Most modules have unit tests that may be run to verify that your solutions to exercises are correct. However, chapter 13 has no unit tests.

Python Exercises, Practice, Solution: Python is a widely used high-level, general-purpose, interpreted, dynamic programming language. Its design philosophy emphasizes code readability, and its syntax allows programmers to express concepts in fewer lines of code than possible in languages such as C++ or Java.
