10. Discuss the structure and function of the pleural membranes. - double-layer membranes that surround the lungs - space between the membranes is the pleural cavity (allows lungs to expand) - membranes secrete a fluid to lubricate lung to protect surface during breathing.
11. What is a lobe? How many are in each lung? A division on the lung

Review Guide for Anatomy and Physiology Respiratory System ...

Short Answers 7. As the concentration of CO₂ in the blood increases, it leads to increased levels of hydrogen ions, decreasing pH. The increase in hydrogen ions in the brain triggers the central chemoreceptors to stimulate the respiratory centers to initiate contraction of the diaphragm and intercostal muscles.
