Laboratory Investigations- A Regulatory Perspective

Nevertheless, a laboratory investigation must consist of more than a simple retest. Simply retesting as a strategy raises three problems: It is a regulatory requirement to conduct an investigation before any retests are conducted. It may imply that there is a lack of control: the laboratory is not concerned as to the causes of possible failures ...

Managing Out of Specification Investigations in Quality ...

PHASE I: LABORATORY INVESTIGATION.

An investigation be conducted when an OOS test result is obtained , The purpose of the investigation is to determine the cause of the OOS result. The source of the OOS result should be identified either as an aberration of the measurement process or an aberration of the manufacturing process.
