A vehicle frame, also known as its chassis, is the main supporting structure of a motor vehicle, to which all other components are attached, comparable to the skeleton of an organism. Until the 1930s virtually every car had a structural frame, separate from its body. This construction design is known as body-on-frame. Over time, nearly all passenger cars have migrated to unibody construction, meaning their chassis and bodywork have been integrated into one another. Nearly all trucks, buses, and

Antique Chevrolet Parts really began in 1971 when I purchased my 1931 Chevrolet Sedan. In those days, when buying the parts I needed, I often saw five or ten of the same thing on the shelves of the older parts stores - twelve 1931 hubcaps, for seventy-five cents each, dated November 1972, is the oldest bill I can still find.
