Applescript Indesign Manual

This chapter covers scripting techniques related to InDesign's scripting environment. Almost every other object in the InDesign scripting model controls a feature that can change a document or the application defaults. By contrast, the features in this chapter control how scripts operate. This document discusses the following:

SCRIPTING GUIDE: APPLESCRIPT

Adobe® InDesign® CS6 Scripting Guide: AppleScript If this guide is distributed with software that includes an end user agreement, this guide, as well as the software described in it, is furnished under license and may be used or copied only in accordance with the terms of such license.

Use the Package command to copy the InDesign (INDD) document, fonts used, and any linked graphics: Choose File > Package. In the Package dialog box, click Package. In the dialog box that appears, enter a name and choose a location for the folder that InDesign creates to copy the packaged content.

Share and save as PDF in InDesign | Adobe InDesign tutorials

Is it possible for AppleScript to automatically fetch needed fonts from TypeKit for InDesign CC? Moving from CS6 to CC 2017, this is becoming a problem because a script batch processes books and magazines to output overnight the PDFs for print and digital publications, but an increasing number of documents are tagged for manual processing in the morning because a designer used a TypeKit font ...
