### Audi A4 Heating System

The auxiliary heating and ventilation systems heat and cool the interior independently of the engine. The auxiliary heating ^ works in conjunction with the air conditioner system, but does not rely on heat from the engine. Instead of this, the system burns fuel. The system's main function is to warm up the interior of the vehicle and to defrost the windows in cold weather.

I have an Audi A4 Quattro turbo model from 2002, and I've been having a lot of problems with the heating/cooling system. One problem I have is when I first turn on my car, before it gets hot, the radiator fan turns on instantly, and after a while it turns off, then once it heats up again it turns on again. It's been a draw from the deck, every time I use the car i wonder if it's gona over heat...
