Key Answer

the identification of bacterial unknowns. Keys that are based upon successive choices between two alternatives are known as dichotomous keys (dichotomous means to “fork into two equal parts”). One use of a dichotomous key is to organize large amounts of information so identifications can be made more easily.

BIOLOGY JUNCTION

"Dichotomous" means "divided into two parts". Therefore, dichotomous keys always give two choices in each step. Dichotomous keys are extremely important tools in science and even in fields like auto repair and crime investigation. This lab uses the identification of some common types of North American fish as an example of how
