Car Subwoofer Wiring Guide

A Single Voice Coil subwoofer (or svc sub) has two wiring terminal posts, one marked positive and the other marked negative. DVC A Dual Voice Coil subwoofer (or dvc sub) has four wiring terminal posts, two positive terminals and two negative terminals.

Subwoofer Wiring Diagrams — How to Wire Your Subs

The power wire from your amp wiring kit (usually 16-20 feet in length) needs to run from the battery, through your car's firewall, through the car's body to the amp. Find an unused grommet in the firewall or one that already has wires or cables passing through it and that has enough room for the power wire to fit through too.

negative (-). A DVC speaker has two voice coils, each with its own set of terminals.

Subwoofer Wiring Diagrams | the12volt.com

Both subwoofers need to have the same voice coil configuration. For example, if it says it is a "Dual Voice Coil (DVC)" subwoofer, and you want to run two subwoofers, they both need to be DVC woofers. Third: Select the impedance that your subwoofer(s) are rated for. For example, if the woofer says "Single 4 Ohm Voice Coil" you would select "4 Ohm" in the wiring tool.
