LIGHT: Light is a form of energy, which induces the sensation of vision in our eyes and makes us able to see various things present in our surrounding. The light ray may be objects self-light or reflected light. Luminous objects are objects which emit light of their own. E.g., sun, bulb, tubelight, glow worms

Light : Chapter Notes - DronStudy.com

Here is what I took from it: "Learn about the light and the science. The magic will happen." Chapter 2 - Light: The Raw Material of Photography. This chapter discusses the physical qualities of light. After a brief hard core physical intro, the chapter turns to discuss the three main qualities of light: Brightness, Color and Contrast. It is already in this chapter that you get a hint on how this book is different.
