Cities have led the way to combat climate change by planning and implementing climate mitigation and adaptation policies. These local efforts go beyond national boundaries. Cities are forming transnational networks to enhance their understandings and practices for climate policies. In contrast to national governments that have numerous obstacles to cope with global climate change in the ...

## **Global Cities and Climate Change - Routledge & CRC Press**

Climate change has demonstrated, perhaps more than any other environmental concerns, the complexities of the human-nature interrelationship and the need for embedding a far greater environmental consciousness into our social values and norms. A drastic reduction in global greenhouse gas emissions requires a transition to low carbon cities. This demands a better understanding of the ...

## **Climate Change and Sustainable Cities - Routledge & CRC Press**

Cities on a Finite Planet: Transformative responses to climate change shows how cities can combine high quality living conditions, resilience to climate change, disaster risk reduction and contributions to mitigation/low carbon development. It also covers the current and potential contribution of cities to avoiding dangerous climate change and is the first book with an in-depth coverage of how cities and their governments, citizens and civil society organizations can combine these different ...

Sustainable travel behaviours have long been sought after in cities around the world, particularly in industrialised countries, but also increasingly in the emerging cities of Asia, South America and Africa. Progress however appears difficult to make as the private car, still largely fuelled by petrol or diesel, remains the mainstream mode of use. Transport is the key sector where carbon ...
