Oxford Assess and Progress Clinical Medicine 2nd Edition PDF

The field of movement disorders consists of a range of neurological conditions in which there is either a paucity of movement, usually associated with rigidity (the akinetic-rigid parkinsonian syndromes), or an excess of movement (the dyskinesias or hyperkinesias). A general principle that is useful in assessing all movement disorders is to divide individual categories into primary versus secondary or symptomatic.

Clinical assessment - Oxford Medicine

This chapter on obtaining an assessment begins by considering why, when, and where to obtain an assessment. Sources of referrals can be from child services (transition referral), primary care, other specialist colleagues, and occasionally other agencies such as social care, education (e.g. higher and further education), and the criminal justice system.
