Global warming is but one component of global depletion. Comfortably Unaware insists that animal agriculture, including fishing and aquaculture (factory farming of freshwater and sea creatures for human, companion and farmed animal consumption), is the primary cause of global depletion - the loss of our renewable and nonrenewable resources including our drinking water, air quality, land, oceans, rainforests, and biodiversity.

Amazon.com: Comfortably Unaware: Global Depletion and Food ...

Comfortably Unaware maintains that our food choices are depleting our planet's resources because "the major cause of biodiversity loss on our planet is from the livestock we raise for food and from overfishing of our oceans," and calls for the consumer to be aware of the brainwashing by the media and become more educated on how to make choices that will save our planet.

Comfortably Unaware - Global Depletion and Food ...

This then perpetuates Global Depletion (see the book, Comfortably Unaware) of our planet's resources and creates substantial increases in risk factors for loss of our own health. As we continue to demand more meat, dairy, and fish products to eat in our country we are also closing our eyes to the true costs to produce those animal products—whether here in the U.S. or in other countries.
