Cooperia species can be a problem in cattle that are less than 1 year old. The "white dewormers" like Safeguard, Synanthic and Valbazen are probably the best choices to control this group of worms, he said. When cattle get older they generally develop good immunity to this group.

**AgrLife Extension expert: Treating Internal Parasites In ...**

Grazing cattle are affected by 4 major parasites: The gastrointestinal strongyles (SGI), parasites of the abomasum, which cause significant growth losses or stunting in cattle. They are present in all cattle that have access to pasture.

**Cattle parasites: What are external and internal parasites?**

Tapeworm and Roundworm Parasites of Cattle \* STOMACH WORMS 597 Three species of roundworms (Haemonchui contortus, Ostertagia ostertagi, and Trichostrongilus axei) are common parasites in the ibomasum, or fourth stomach, of cattle. Of these the first is the best known and is commonly referred to as the stomach worm or twisted wireworm.

**Tapeworm and Roundworm Parasites of Cattle**

The principal worm parasite of beef and dairy cattle is Ostertagia, a very small (1/2 inch) brown worm found on the lining and in the gastric glands of the abomasum (the true stomach). Adult worms graze the lining or mucosa and cause irritation and fluid loss, interfering with the digestive function of the stomach.

**Common Internal Parasites of Cattle | MU Extension**

Footrot is a very common infectious cattle disease that causes lameness at least in one foot. The causal agent is Fusobacterium necrophorum and Bacteroides melaninogenicus. The bacteria invade through the lacerated or wet skin of the foot. The disease is extremely painful and contagious.

**18 Most Common Cattle Diseases: You Must Know As A Farm Owner**

Lone star ticks are important cattle parasites from southeastern Texas to northeastern Kansas and eastward through the southern half of the country. Blacklegged ticks are pests of cattle throughout the same region as well as in Northeastern and North Central states. The Rocky Mountain wood tick is predominant in the Rockies.

**External Parasites | Drivers**
