Plus, ManyBooks has put together collections of books that are an interesting way to explore topics in a more organized way.

### Communicating And Le Systems

A communications system is an integrated system of communications hardware. This can include transmissions equipment, relay stations, tributary stations and other data terminal equipment. A communications system can even include other communications systems. A good example would be a regional emergency response communications system that connects several different cities and allows them to respond to a disaster by integrating systems they have installed for their own police and firefighters.

### What is a Communications System? - Definition from Techopedia

The system of communication must be used efficiently, timely i.e. at the appropriate time and when it is necessary. The economy in use of communication system can be achieved in this way. 5. Feedback: The purpose of communication will be defeated if feedback is not taken from the receiver. The confirmation of the receipt of the message in its ...

### Communication: Meaning, Purpose, Importance and Principles

In telecommunication, a communications system or communication system is a collection of individual communications networks, transmission systems, relay stations, tributary stations, and data terminal equipment usually capable of interconnection and interoperation to form an integrated whole. The components of a communications system serve a common purpose, are technically compatible, use common procedures, respond to controls, and operate in union. Telecommunications is a method of communicatio
