CBM is also critical for calculating dimensional weight, chargeable weight, calculating freight class, or for requesting a freight quote. What is the meaning of CBM?

CBM Calculator | Freightos

Subtract the volume of the object from the volume of the container to find the packaging volume. For example, if the box is 7,680 cubic inches and the object is 1,200 cubic inches, then the packaging volume is 7,680 - 1,200 = 6,480 cubic inches. Convert cubic inches to cubic feet by dividing by 1,728.
