Death bonds are a type of bond that is based on a group of life insurance policies. Individuals will sell their life insurance policies to investment companies and the companies will then package the policies together to form bonds. This type of investment carries with it some advantages and disadvantages for investors.

Pros and Cons of Death Bonds - Financial Web

Death bonds are a type of asset-backed security that has its origins in viatical settlements (aka life settlements) in the 1980's and 90's. This was the time when AIDS was rampant and incurable, and many sufferers needed or wanted cash, so they sold their life insurance policies to certain companies or investors that were offering to pay cash for the policy.

owners by investors and pooled into bonds.

Death bond - Wikipedia

A death bond is an asset-backed security derived by pooling life insurance policies, which are then repackaged into bonds and sold to investors.

Life Settlement Definition - Investopedia

Death bonds are macabre investments that are also very novel and controversial. On one hand, the insurance holders can receive much-needed cash to fund retirement or pay medical expenses while they are still alive. On the other hand, one of the many controversial aspects of death bonds is that the sooner the insured dies, the higher the returns are for the investors (after all, Company XYZ does not have to keep paying the insurance premiums for the person).
