Democratic Governance And New Technology

The focus of this book is the relationship between new forms of information and communication technology (ICT) and the current restructuring and redefinition of many of the fundamental relations within the political systems of Western European countries. The basic claim of the book is that ICT plays an important role in this process of restructuring and redefining.

NDI views the development of effective, democratic, public-sector institutions as a critical component of its mission. It is through improved governance that the benefits of democratic development most directly impact the lives of citizens.

Conversely, the inability of public sector institutions to function effectively and democratically undermines the sustainability of democratic reform.
