egger osb 2 EGGER OSB boards of technical class OSB 2 are intended for load-bearing use in dry conditions and are glued formaldehyde-free. They are manufactured with an unsanded surface.

EGGER OSB 2 | EGGER
EGGER OSB boards are multilayer boards with a three-layer structure of micro-veneers, so called strands, which are approved for load-bearing construction. The special strand geometry and strand orientation in the surface layers, as well as the low-emission glueing, ensure the best technical properties. All OSB boards comply with European standards.

OSB Boards - Egger
The classification "D-s1, do" of OSB 2 for board thickness > 12mm and density ≥ 580 kg/m³ was gained and declared by EGGER's own testing. In 2004 when the test was done, it was sufficient to test the boards tightly fixed to an A2 substrate (mineral wool), so there wasn't much oxygen accelerating the burning and smoke release.

Properties | EGGER
Just as an example, the design value of the MOE for solid softwood is ~ 10,000 N/mm², whereas the design value for OSB 3 on major axis is 4,930 N/mm² (or 6,780 N/mm² for OSB 4 TOP). In case of using softwood-glulam, this value goes up to 11,000 N/mm², or up to 12,500 N/mm² for hardwood-glulam (beech, oak).

Product Comparison | EGGER
