If you want to build a small fiberglass boat as an amateur, the choices are much more limited. There are ways to go about it and occasionally someone does. Phil Coveny bought plans for our smallest design, the 8ft Dixi Dinghy. It is a plywood 3:1 dinghy intended as a yacht tender or a child's first boat.

For most amateurs, plywood is the material of choice. Plywood is one of the cheapest and easiest building materials, one that the average do-it-yourselfer is both familiar and comfortable with. Plywood is also, pound for pound, stronger than steel. Because of its high strength to weight, plywood construction yields a boat that is much lighter [...]
