How Google Tests Software

Software Testing is a Focus, Not a Team. As Google's team grew, software engineers building and testing their own didn't scale. Instead of rolling out a more traditional testing team, Google started creating specialized engineering roles to help boost the organization's QA bandwidth holistically.

What you can learn from how Google tests software ...

In an article from 2011, InfoQ reports Google's testing department is relatively small for the amount of developers but works well because, like Facebook, every engineer is responsible for their own code's tests. Google's achieved this by creating a culture of testing, and not an abstract, disconnected testing department.

Google Testing Blog: How Google Tests Software - Part One

User focused testing is the job of the Google TE. Assuming that the SWEs and SETs performed module and feature level testing adequately, the next task is to understand how well this collection of executable code and data works together to satisfy the needs of the user. TEs act as a double-check on the diligence of the developers.
