Get Free How To Roll Start A Manual

Push starting, also known as bump starting, clutch starting, popping the clutch or crash starting, is a method of starting a motor vehicle with an internal combustion engine and with a manual transmission and with a mechanical fuel pump and a mechanically driven generator or alternator. By pushing or letting the vehicle roll downhill then engaging the clutch at the appropriate speed the engine will turn over and start. The technique is most commonly employed when other starting methods are unava

Push start - Wikipedia

Place the key in its keyhole and turn it all the way into the "on" position. (Regularly turning the key here would initiate the starter) Once the starter has failed to start the vehicle, the driver should shift into a gear. The car will now need to move by the use of physical force.
