"I own a 2002 Glaston with a Volvo Penta 5.0GL-B. Last year the boat run great, but idle to high around 1100rpms. This Spring I checked the timing and I saw a V wedge with white paint in the middle of the V wedge and noticed the mark was advanced from the center of the V wedge. I set the timing so the mark was in the middle of the V wedge

I've built a bit of a mixed engine. LQ4 bottom end (24x crank, low compression 6.0L), LS3 heads & intake. Texas Speed cam 229°/236° duration, .624"/.615" lift, 112° LSA HP EFI. I've got a few things that I can't figure out. First, my motor likes a LOT of timing. It doesn't like to idle with anything less than 25° (it really likes 35°-40°), and it likes 33° in the

Online Library Ignition Timing 3 0l Marine Engine

higher RPM.

My LS likes very high timing. I can't figure out why.
