The one nice aspect about the stock system is that the parts are dirt cheap. If you haven't priced ignition parts for new cars (especially other 4-cyl engines), I can guarantee that you that you won't be able to replace the ENTIRE system (minus distributor itself) with new OEM parts for the \$75 the VW system costs.

Understanding the Ignition System - Richard Atwell's VW ...

I like to have a look at some 16v turbo ignition maps to compare. I've rebuilt my engine and added tt cams since I last tuned on the dyno. Even then I really didn't have much time to spend on ignition tuning. any maps to share? I'll post mine up in a bit. Car runs well but I'm trying to dial it in for max power now.

Mofoco is one of the slowest because Mofoco is the one of the best. Buy with confidence directly from the engine builder. Mofoco has almost 50 years of experience in the VW industry building aircooled VW engines. How many other companies allow you to speak with the person building your engine?

Mofoco VW Engines

The faster the engine is going, the less time the combustion has to get the pressure when it needs to. So the ADVANCE gives the combustion more time to do this. Most "get" this concept. Where they fall short are in the other aspects of combustion WRT ignition timing. 1) a hot engine will have faster combustion than a slow one.

The VW aero engine for my RJ.03 IBIS is going to get a double Leburg electronic ignition system. The beauty of the Leburg ignition system is that when starting the engine (at zero RPM), the ignition is timed at +3° TDC, which means that backfiring when hand-propping is entirely impossible and starting is very easy and smooth.
