### **Influence of Stakeholders on Industrial Design Materials**

...

Industrial design is a process of design applied to products that are to be manufactured through techniques of mass production. A key characteristic is that design precedes manufacture: the creative act of determining and defining a product's form and features takes place in advance of the physical act of making a product, which consists purely of repeated, often automated, replication.

### **Industrial engineering - Wikipedia**

An industrial designer also has to be able to offer a lot of options and flexibility, working closely with the engineers to determine how to manage costs through the use of different manufacturing techniques, materials or functions. To achieve this, industrial design and styling needs to be performed early in the product development process.
