Auto Layout is a development tool for constructing adaptive interfaces. Using Auto Layout, you can define rules (known as constraints) that govern the content in your app. For example, you can constrain a button so it's always horizontally centered and positioned eight points below an image, regardless of the available screen space.

In iOS 11, Apple is deprecating the top and bottom layout guides and replacing them with a single safe area layout guide. Use these safe areas to make sure your app works properly with the new dimensions of iPhone X. Apps with custom layouts can also easily support iPhone X, especially if your app uses Auto Layout and adheres to these guidelines.
