Project Gutenberg (named after the printing press that democratized knowledge) is a huge archive of over 53,000 books in EPUB, Kindle, plain text, and HTML. You can download them directly, or have them sent to your preferred cloud storage service (Dropbox, Google Drive, or Microsoft OneDrive).

Java Api Documentation
For further API reference and developer documentation, see Java SE Documentation. That documentation contains more detailed, developer-targeted descriptions, with conceptual overviews, definitions of terms, workarounds, and working code examples.

Java Platform SE 7 - Oracle
For further API reference and developer documentation see the Java SE Documentation, which contains more detailed, developer-targeted descriptions with conceptual overviews, definitions of terms, workarounds, and working code examples. Java is a trademark or registered trademark of Oracle and/or its affiliates in the US and other countries.

Overview (Java SE 14 & JDK 14) - Oracle Cloud
This tool is used to create a standard documentation of Java code in HTML file format. In fact, Java officially uses this tool to create its own library API documentation. To make Java code documentation ready, one must adhere to certain norms while writing the code so that the javadoc tool is able of run through the java file and create the API documentation.

How to Create Java API Documentation - Developer.com
To create the API documentation, the captains of Java ran a program called javadoc. The javadoc program took lines like these right out of the PrintStream.java file and used the lines to make the documentation that you see in your web browser. Other Java programmers do the same thing.

Making Sense of Java's API Documentation - dummies
Furthermore, APIs should have documentation that explains all endpoints, types of returned values, etc. After you find an interesting API and read documentation, you have to send a request – one single task for the server (receiving side).

The JavaMail API also supports several System properties; see the javax.mail.internetpackage documentation for details. The JavaMail reference implementation includes protocol providers in subpackages of com.sun.mail. Note that the APIs to these protocol providers are not part of the standard JavaMail API. Portable programs will not use these APIs.
