Naming Ionic Compounds Practice Worksheet

You need to recognize the ions in an ionic compound. The name gives you this information. The cation is always given first in a name, followed by the anion. So, you know the first part will always have a positive charge and the second part will have a negative charge. To know the charges, look at the periodic table. Sodium is an alkali metal, so you know it has a +1 charge, while chlorine is a halogen, so you know it has a -1 charge.
