Review: The Maintenance Planning and Scheduling Handbook

Maintenance planning and scheduling are two different functions that, when used together, form a maintenance program. Maintenance planning can be defined as an end-to-end process that identifies and addresses any possible issues ahead of time.

Maintenance Planning and Scheduling: An Overview

Planning is the the process of planning, while scheduling is the process of reconfiguring workloads in a production/manufacturing process. Scheduling is used to allocate plant and machinery resources, plan human resources, plan production processes, and purchase materials. Computerized Maintenance Management Systems (CMMS) offer the tools to ...
