Super's Developmental Self-Concept Theory Vocational development is the process of developing and implementing a self-concept. As the self-concept becomes more realistic and stable, so does vocational choice and behavior. People choose occupations that permit them to express their self-concepts.

Overview of Career Development Theories

We propose a model of vocational choice that can be used for analyzing and guiding the decision processes underlying career and job choices. Our model is based on research in behavioral decision making (BDM), in particular the choice goals framework developed by Bettman, Luce, and Payne (1998). The basic model involves two major processes.

Vocational choice: A decision making perspective ...

The Holland Codes or the Holland Occupational Themes (RIASEC) refers to a theory of careers and vocational choice (based upon personality types) that was initially developed by American psychologist John L. Holland. The Holland Codes serve as a component of the interests assessment, the Strong Interest Inventory.
