

Maximum Entropy And Ecology A Theory Of Abundance Distribution And Energetics Oxford Series In Ecology And Evolution 1st Edition By Harte John 2011 Paperback

This is likewise one of the factors by obtaining the soft documents of this **maximum entropy and ecology a theory of abundance distribution and energetics oxford series in ecology and evolution 1st edition by harte john 2011 paperback** by online. You might not require more get older to spend to go to the books creation as skillfully as search for them. In some cases, you likewise accomplish not discover the pronouncement maximum entropy and ecology a theory of abundance distribution and energetics oxford series in ecology and evolution 1st edition by harte john 2011 paperback that you are looking for. It will completely squander the time.

However below, later you visit this web page, it will be so very easy to acquire as well as download lead maximum entropy and ecology a theory of abundance distribution and energetics oxford series in ecology and evolution 1st edition by harte john 2011 paperback

It will not take many become old as we tell before. You can accomplish it though proceed something else at home and even in your workplace. correspondingly easy! So, are you question? Just exercise just what we meet the expense of below as skillfully as evaluation **maximum entropy and ecology a theory of abundance distribution and energetics oxford series in ecology and evolution 1st edition by harte john 2011 paperback** what you gone to read!

Integrates ecology and maximum entropy to provide a comprehensive, predictive, and parsimonious theory that describes the major observed patterns in macroecology The Maximum Entropy Theory of Ecology (METE) is placed in a wider context with other theories including Brown's Metabolic Theory of Ecology and Hubbell's Neutral Theory of Ecology

Maximum Entropy and Ecology - Paperback - John Harte ...

Paralleling the derivation of thermodynamics from the maximum entropy principle, the state variable theory of ecology developed in this book predicts realistic forms for all metrics of ecology that describe patterns in the distribution, abundance, and energetics of species over multiple spatial scales, a wide range of habitats, and diverse taxonomic groups.

Maximum Entropy and Ecology: A Theory of Abundance ...

This pioneering graduate textbook provides readers with the concepts and practical tools required to understand the maximum entropy principle, and apply it to an understanding of ecological patterns. Rather than building and combining mechanistic models of ecosystems, the approach is grounded in information theory and the logic of inference.

Harte et al . have developed a maximum entropy theory of ecology (METE) grounded in information theory, which predicts the form of most macroecology metrics found in the literature, needing very limited empirical data as input and no adjustable parameters (Harte et al . 2008; Harte, Smith & Storch 2009; Harte 2011).

Maximum Entropy And Ecology: A Theory of Abundance ...

The maximum information entropy (MaxEnt) principle is a successful method of statistical inference that has recently been applied to ecology. Here, we show how MaxEnt can accurately predict patterns such as species-area relationships (SARs) and abundance distributions in macroecology and be a foundation for ecological theory.

Provides readers with the concepts and practical tools required to understand the maximum entropy principle, and apply it to an understanding of ecological patterns. The theory developed predicts. realistic forms for all metrics of ecology that describe patterns in the distribution, abundance, and energetics of species.

Maximum entropy and ecology : a theory of abundance ...

Abstract. Maximum entropy (maxent) models assign probabilities to states that (1) agree with measured macroscopic constraints on attributes of the states and (2) are otherwise maximally uninformative and are thus as close as possible to a specified prior distribution. Such models have recently become popular in ecology, but classical inferential statistical tests require assumptions of independence during the allocation of entities to states that are rarely fulfilled in ecology.
