The diesel engine is a plus on the bush where that fuel is more readily available (in really remote areas) and gives you more range for big holidays in the mulga. Don't rule out things like the Mitsubishi Pajero, either, which won't be as around-town friendly, but is a proven quantity and is absolutely tremendous off-road.

### Mitsubishi Pajero Problems & Reliability Issues | CarsGuide

Count the number of times the malfunction indicator lamp (check engine lamp) on the instrument panel flashes on and off. The number of flashes represents the trouble code. There is a slight pause between the flashes representing the first and second digits of the code. Longer pauses (approx. 4 seconds) separate individual trouble codes.

Hello Pajero Guru, I have a 2006 Mitsubishi Pajero 3.2DiD GLX A/T. The vehicle drives pretty much normally until the accelerator pedal is fully depressed to full throttle (in other words - the kickdown switch is activated) The engine light then comes on - the engine loses power and would not rev more than 3000rpm - vehicle goes into limp ...

### 3.2 DiD - Pajero.guru | Everything about Mitsubishi Pajero

The 3.0L and the 3.5L engines have a slightly different method of getting the codes with the 3.0L relying on a flashing test light/pulsing on a multimeter and the 3.5L instead flashing the check engine light (CEL). The 3.5L will also flash the A/T light (A/T oil temp warning) which can be used to read faults with the automatic transmission.

### Mitsubishi Pajero Questions - technical assistance on the ...

The Mitsubishi Pajero iO is a mini sport utility vehicle produced by the Japanese manufacturer Mitsubishi between 1999 (since June 15, 1998, in three-door form, and August 24, 1998, as a five-door) and 2007. The "iO" name is derived from the Italian for "I" which, according to Mitsubishi, "generates an image of being easy to get to know, easy to drive, and of being one's very own Pajero".
