Multi Split Systems | Mitsubishi Heavy Industries Air ...

What is split system air conditioning? A split system AC is split into two parts: a wall-mounted indoor unit in the room you're cooling, and an outdoor unit that contains the compressor box. Warm air from inside is transferred outside and replaced with refreshingly cool air via a pipe that contains refrigerant gas.

Multi Split System Air Conditioners | Multi Split AC System

Multi vane flow - even heat distribution. The multi vane flow function blows warm air in both an upward and downward direction, providing even and effective heating whilst also eliminating draughts. This is achieved via three uniquely shaped vanes designed for better airflow control. So you can customise airflow to your preference.
