Configuring BPEL Process Service Components and Engines

BPEL is an XML-based language for enabling task sharing across multiple enterprises using a combination of Web services. BPEL is based on the XML schema, simple object access protocol (SOAP), and Web services description language (WSDL). BPEL provides enterprises with an industry standard for business process orchestration and execution.

Introduction to Oracle BPEL Process Manager

Oracle BPEL Process Manager is a BPEL engine that is a member of the Oracle Fusion Middleware family of products. It enables enterprises to orchestrate disparate applications and Web services into business processes. The ability to quickly build and deploy these processes in a standards-based manner delivers critical functionality for developing a Service-Oriented Architecture (SOA).

Oracle BPEL Process Manager - Wikipedia

As part of Oracle SOA Suite, Oracle offers the BPEL Process Manager engine and Oracle JDeveloper to create BPEL applications. Another option is to execute the process in Oracle Business Process Management Studio. (This is outside the scope of this article however.)
