Solving word problems

Download Free Physics Word Problems Study

on homework, quizzes, and tests is a two-part process. First, you must be able to carefully read the question and translate it into a numeric equation. Second, you must be able to solve the problem correctly. Many times, students make a mistake in the first step, which almost always leads to a wrong answer in the end.

Word Problems - Study Guide Zone

The first step to solving a word problem is to identify the question. While identifying the question, you should assign a variable to the unknown. It's good practice to use a letter or symbol that is meaningful to the situation (like the first letter of the word).

Problem : The earth rotates around the sun with a constant speed. Is the earth an inertial reference frame? At first glance, the earth seems to be an inertial reference frame, as it retains constant speed. However, it does not retain constant velocity. Recall that velocity is a vector while speed is a scalar.
