Be sure to allow time to adjust your machine if you're using one. Don't fudge on the start and end of the high-intensity interval, push through the entire time. (It will be over before you know it!) If anything, take a second or two less of rest. You might detest the thought in the moment, but you'll be glad you did when the results start showing up.

### The Basics of High-Intensity Interval Training - dummies

This pocket guide aims to provide a day-to-day companion for those working in CMR. The aim is to provide a short overview of the physics underlying the main investigations ... • Signal intensity is determined by the relaxation ... • Low spatial frequency contributions are found at the centre of k-space and high spatial frequencies at the
