A pressure injury is an injury to the skin and/or underlying tissue, usually over a bony prominence. It occurs as a result of pressure alone, or pressure in combination with shear and/or friction. Shearing forces usually occur as a result of sliding or dragging the skin across a support surface such as a mattress.

Case management is a care approach that coordinates and links health care services to patients and families while streamlining costs. In the team nursing care model, the RN assumes the role of group or team leader and leads a team made up of other RNs, licensed vocational nurses, and nurse assistants or technicians.
