remove stuck foods from vending machines or a new vending machine that makes it impossible for food to get stuck.

The Engineering Design Process: Define the Problem

Engineers solve problems. A Problem Statement is a description of the problem. A project proposal is more general. A Problem Statement is a contract negotiated between the engineering and the client or instructor. Most students make the mistake of talking about solutions instead of making a problem statement. Avoid talking about a solution.

General Engineering Introduction/Problem Statement ...

Problem statements often have three elements: the problem itself, stated clearly and with enough contextual detail to establish why it is important; the method of solving the problem, often stated as a claim or a working thesis; the purpose, statement of objective and scope of the document the writer is preparing.

Problem Statement - MIT

A problem statement is a short description of a problem or an issue which needs addressing or a condition which needs improvement. Making a problem statement template would allow you to identify the gap between the current state or the problem and the desired state or the goal of a product or a process. As this document focuses on the facts, the design of all problem statement examples addresses the 5W's namely who, what, where, when, and why.
