about which there is much disagreement among historians. Some portray it as a significant era of triumph in human development, while others claim that the term is nearly meaningless and the whole concept should be abandoned. However all agree that Renaissance was the era, during which the cultural, economic, social, and humanistic

2366 Words | 10 Pages. Behavioural economics is the study of the effects that psychology has on the decision making of the economy. This tends to be the way that people think and feel when they are spending money on a certain good or service. The great economist Adam Smith was the first follower of this

The Renaissance was a time of innovation and renewal, which brought

brand new ideas and inventions across Europe. The Renaissance shifted

humanity's worldview toward

egocentricity and human-centeredness as opposed to the more apostolic lives

they had lead previously. However, such a great shift can only take place slowly
