Excerpt from Research Paper : Type 2 diabetes (T2D) is a major chronic illness in the U.S., with 84 million adults being pre-diabetic (Centres for Disease Control and Prevention, 2017). Whereas risk factors are numerous, minority groups are at a particularly greater risk for T2D compared to the rest of the population. The high risk stems in large part from acculturation challenges - difficulties associated with adapting to the host country's social and cultural norms (Deng, Zhang & Chan ...
