rubber processing and production organization

Under the umbrella of the Harburg-Freudenberger Maschinenbau GmbH, we provide the rubber and rubber-processing industry with a range of machines for all key stages of production - from raw material processing to rubber processing up to vulcanisation. In addition, we develop and manufacture machines and systems for the edible oil industry.

Organization - HF GROUP

The rubber production process begins with natural or synthetic rubber. Natural rubber comes from latex. Synthetic rubber derives from molecular polymers. Whether natural or synthetic, rubber continues through four steps: compounding, mixing, molding and casting, and, finally, vulcanization.

The Manufacturing Process of Rubber | Sciencing

Rubber Processing and Shaping •Production of rubber goods consists of two basic steps: 1. Production of the rubber itself Natural rubber is an agricultural crop Synthetic rubbers are made from petroleum 2. Processing into finished goods, consisting of: (a) Compounding (b) Mixing (c) Shaping (d) Vulcanizing

RUBBER PROCESSING TECHNOLOGY

THE RUBBER INDUSTRY. Malaysia is the world's fifth largest producer of natural rubber after Thailand, Indonesia, Vietnam and China. Natural latex from rubber while synthetic rubber is a derivative from petrochemical. The key property of natural rubber is low heat built up. It is used in gloves and also for production of tyres.

Topic 25 - Rubber Industry in Malaysia - An Overview | AER

The manufacturing of rubber products involves six principal processing steps (mixing, milling, extrusion, calendering, curing, and grinding), with ancillary steps in between. Initially, the raw rubber (natural or synthetic) is mixed with several additives which are chosen based upon the desired properties of the final product.

Rubber Product Manufacturing in the US - Industry Data ...

Rubber processing consists of four basic steps: (1) mastication, when the elastomer is sheared and the molecules are broken down to give easier flow, (2) mixing, usually carried out immediately after mastication, when additives are incorporated, (3) shaping of the viscous mass, for example, by extrusion or molding, and (4) curing, when the polymer molecules become interlinked and the shape is fixed.

Rubber - Processing | Britannica

Natural rubber, also called by other names of India rubber, latex, Amazonian rubber, caucho or caoutchouc, as initially produced, consists of polymers of the organic compound isoprene, with minor impurities of other organic compounds, plus water.Thailand and Indonesia are two of the leading rubber producers. Types of polyisoprene that are used as natural rubbers are classified as elastomers.

Natural rubber - Wikipedia

Introduction to rubber processing and safety issues This section provides details of the mechanical processes involved in the production of various types of rubber goods. Details are included of the various safety and fire and explosion hazards but there are only brief references made to the health risks. For information on health risks see

Introduction to rubber processing and safety issues

In the Rubber Processing Industry, rubber making involves various types of blowers and fans. American Fan Company has several different types of pressure blowers for use in rubber making.
