Integrated technology functions for counting and measuring tasks, regulation and motion control make the SIMATIC S7-1200 a versatile system that is perfectly suited for numerous automation tasks. Thanks to the integrated PID controllers, you can precisely and efficiently adjust physical variables (such as room

S7-1200 Motion Control V13

For S7-1200, the
motion control version
is V6.0 for TIA V15...

Using the analog
output with motion
control directly, there
is no hijacking of this
port... In OB "MC-
PostServo" you could
manipulate the data
area of the output
value, as it is written to

Access Free S7
1200 Motion
Control V6.0 In Tia
a DB or directly to
analog out. And I think
it is working as well in
S7-1200.
