SAP BW/4HANA- Technical Overview

Dear SAP BW/4HANA enthusiasts! With SAP BW/4HANA 2.0 (released in Q1.2019) the DataStore object (ADSO) has received a new write interface which was introduced in Gordon Witzel´s earlier blog about Data Integration with SAP BW/4HANA 2.0. This new interface provides the possibility to integrate data into the ADSO inbound table without the need of the normal standard SAP BW/4HANA objects like ...

Processing type SAP HANA Exit is a specific form of processing type Customer Exit. It allows you to use an AMDP class implementation to determine default values for variables. We particularly recommend using the SAP HANA Exit in queries that you want to generate an external SAP HANA view for, and which special requirements apply for in terms of determining the variable values.

SAP BW on HANA offers a significant increase in business analytics performance due to the speed of the SAP HANA in-memory database. By running on ultra-fast solid-state memory, BW on HANA can, for example, generate reports in hours that might have taken days on a traditional Hard Disk Drive database. It can also query current data instead of ...
