We have two servers: Server 2012 R2 RDS Server 2008 R2 RDS Users are constantly reporting being unable to change their screen resolution. After some digging, the reason they're trying to change the resolution is because their text is too small to see. DPI scaling is obviously the answer, but ... - Hi. For Server 2008 R2 you need to apply the hotfix to ...

Change DPI scaling inside RDP session (2008 R2 / 2012 R2)

It renders in that percentage of the screen resolution you play at. Then scales it up to fit your screen resolution. So if you set screen resolution to 1920 X1024 and screen percentage to 50%, it'll actually render in 910 x 512 and then scale it up to fit your resolution. The render is a lot less taxing on the GPU (1/4 as many pixels actually ...

What is screen percentage? - Unreal Tournament Forums

Steam Hardware & Software Survey: September 2020. Steam conducts a monthly survey to collect data about what kinds of computer hardware and software our customers are using.

Steam Hardware & Software Survey

In reality the percentage system is just a virtual resolution of 100 x 100 with a distorted aspect ratio, you choose which aspect ratio with the SetDisplayAspect command. For example 320 x 480 is an aspect ratio of 0.66 so using this value would stretch the 100x100 square into a rectangle that would be full screen on a 320 x 480 device.

Display - AGK Help

1920x1200. 1.5%. 1360x768. 1%. Other high resolutions. 7.3%. Resolution. January 2019. 1536x864.
