Article name changed from "Simplified Chinese characters" to "Simplified Chinese" I've just noticed the article's been moved to "Simplified Chinese" with "Naming conventions mandate to name articles according to what the thing is known as to most people" as the justification. I think this should be discussed before such a move.

Bresenham's line algorithm is a line drawing algorithm that determines the points of an n-dimensional raster that should be selected in order to form a close approximation to a straight line between two points. It is commonly used to draw line primitives in a bitmap image (e.g. on a computer screen), as it uses only integer addition, subtraction and bit shifting, all of which are very cheap ...
