Sony D 555 D Z555

The D-Z555 was the first Discman to employ 8 times oversampling. This method of CD playback reduced the amount of digital “noise” that could enter the analogue stages and resulted in a purer sound than was obtainable by conventional means.

There is no difference between the D-555 and the D-Z555, they are both the same. They just have different model number designations depending on what part of the world they are being sold in. The D-Z555 designation is most often seen in the units that were sold in European and Asian countries while the D-555 designation is more common in the US.
