Space law is the body of law governing space-related activities, encompassing both international and domestic agreements, rules, and principles. Parameters of space law include space exploration, liability for damage, weapons use, rescue efforts, environmental preservation, information sharing, new technologies, and ethics. Other fields of law, such as administrative law, intellectual property ...

We combine the perspectives of law, policy and operations, and the Commentaries benefit from the input of colleagues representing these different aspects of our work. However, we did not do it alone. The ICRC today is more of a 'Guardian 2.0' of the Geneva Conventions, we do not own IHL, and we are not the only ones to interpret it; instead, we ...

The Outer Space Treaty, formally the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, is a treaty that forms the basis of international space law. The treaty was opened for signature in the United States, the United Kingdom, and the Soviet Union on 27 January 1967, and entered into force on 10 ...

## **Outer Space Treaty - Wikipedia**

The rule of law feeds on the idea of the law's independence; it is based on the assumption of autonomy of the law. Since its beginnings, sociology of law has questioned this autonomy in different ways and with regard to its social functions; socio-legal studies have shown how courts and tribunals, while asserting themselves as „neutral ...
