## **How to Change Manual Transmission Fluid - YouTube**

Fluid changing is not an option, and there are other fluids in your car than just the oil! Changing the transmission and differential fluid allows the rotating parts to remain properly lubricated, provides you a better shifting feel and gives you the satisfaction of knowing that you're protecting your car from wear. The 6 speed manual transmission, introduced in 1999, has a couple variations to the fluid change procedure from the previous 5 speeds.

Changing your transmission gear oil every 70-90,000 miles (depending on use) will help keep the car's transmission shifting smoothly and prevent excess wear. Unlike earlier VW 5 speed transmissions, you cannot just drain and fill the transmission fluid level back to the inspection/fill hole.

## **Manual transmission gear oil change Jetta**

It is important to use the correct fluid oil in you manual transmission, the vehicle manufacturers have done extensive testing to specify the correct fluid. The oil is designed to reduce friction and provide necessary cooling. Information is provide for most vehicles.

## **Oil Chart Manual Transmission - drivetrain.com**

In my opinion, the transmission fluid should be changed every 50,000 miles or about once every two years. This number is a rough estimate, and may vary depending upon your use of your VW (track vs. street). There are many moving parts in the transmission. These moving parts have a tendency to drop small microscopic metal particles into the oil.

## **How-To: 6-Speed Manual Transmission Oil Change | Page 9 ...**

FWIW, ToymoCo specs either a GL-4 or GL-5 for both the manual transmission and the transfer case on the early transmissions but later dropped the GL-5 rating for the transmission, at least for the 6-speed, on later models. For example, my '14 6-speed says only GL-4 in the transmission. But the dual rating has been maintained for the transfer case.
