Edited transcript of Andrew McLaughlin, posing a hypothetical argument about the Digital Divide. Let me start off today's session by making the case against caring about the digital divide, at least in that sense. As you probably will guess, all of us that are up here think something different than what I am about to say, but let me start off by making this case.

## **Module I - Hypothetical Argument on Digital Divide**

Though these pieces have been previously published, the organization of The Digital Divide gives them freshness and new relevancy, making them part of a single document readers can use to truly get a handle on online privacy, the perils of a plugged-in childhood, and other technology-related hot topics. Rather than dividing the book into "pro" and "con" sections, the essays are arranged by subject-"The Brain, the Senses," "Learning in and out of the Classroom," "Social and Personal Life ...

A pedagogical approach that argues for enhanced use of digital technology based solely on student age is based on a thin foundation. And students who don't neatly fit the Digital Native profile risk falling through the cracks of this thin foundation. An Approach to Reconciling the Two Sides I must lie down where all ladders start,

## **Bridging the Digital Divide - Academic Matters**

We can address the digital divide with these three policies: (1) allow cities to provide their own broadband; (2) expand and reform Lifeline; and (3) provide tax incentives to firms that subsidize...

## **Three Policies To Address The Digital Divide**

Widening levels of education seem to magnify the digital divide; households with higher levels of education are increasingly more likely to use computers and the Internet. It has been observed that those with college degrees or higher are 10 times more likely to have internet access at work as than those with only a high school education.
